

wästberg / w 164 alto

#### Product Information

w 164 alto is a new type of free standing lamp for indirect light. The pole houses a sophisticated 10,000 Lumen multi-directional LED technique, giving a very even and super-wide-angle light distribution. Almost 180°.

The top disc of the base is a large dimming wheel, which also includes the switch. w 164 alto features dynamic dimming meaning that the colour temperature of the light gets warmer when the lamp is dimmed down.

The off-centre lateral constellation of the cylindrical units evokes a brutalist, deconstructionist view on architecture. w 164 alto shares these values to become the definition of the attitude behind the concept.

Design: Dirk Winkel
