Koinè wall

The wall version is equipped with a reflector 20 cm diameter with a characteristic cone shape, mounted on a thin tubular structure.

The lamp is powered by a plug-in ballast and fixed to the wall.

1A070A200001 ● black € 554,00

Grande Costanza Open Air

New Costanza Open Air suspension structure. The structure is compatible with both lampshades diameter 70 and H 49 of the floor version and with a new lampshade with a diameter of 50 H 35. Grande Costanza Open Air is a perfect example of how a Luceplan product originally envisioned for interiors, with a few adaptations in terms of materials and finishes, can also live in hybrid indoor-outdoor spaces such as terraces, verandas and porches.

track adapter

Thanks to the specific adapter, the suspension version with a reflector diameter of 20 cm, which retains its characteristic cone shape, can be installed on a track.

● AVAILABLE

TRACK ADAPTER
dimmable DALI
Only compatible with Luceplan track

A07/11 only for version Ø 20

1A070/110001	● black	€ 175,00
1A070/110002	○ white	€ 175,00

Koinè

multiple ceiling rose

The new multiple ceiling rose can accommodate 3 suspension structures with a diameter of 20 cm. Thanks to the possibility of aggregating multiple rosettes that guarantee electrical continuity and allow $\pm 90^\circ$ rotation between them, it is possible to define a distribution of a large number of light points according to various geometric configurations.

● IN STOCK FROM THE END OF MARCH

MULTIPLE CEILING ROSE only for version Ø 20
